- Bulgarian

Education

(2024-2027)
MBO RIJNLAND GOUDA
Software development

(2020-2024)
EDITH STEIN COLLEGE
Middle School/ International Dutch classes

Experience

- Web & Software Development Experience
- Gaining hands-on experience through various school projects, including a calculator app, website designs (HTML & CSS), and multiple JavaScript-based projects such as a coin counter, voice-reactive design, and interactive rain models.
- Won two consecutive project weeks with my teams—first for a JavaScript game and second for a PHP-based quiz website using a database.
- Currently expanding my skills by diving deeper into JavaScript frameworks like Vue.js and MySQL databases, while also gaining practical experience with 3CX and Yeastar systems to broaden my knowledge in full-stack and communication-based development.
